## TransRoad

The software for transport  
and shipping management  
in the Cloud

OUR PURPOSE

“We unite experts to create a more conscious economy”

Cost-effective ecosystems are stable when they make value-added synergies possible for the stakeholders. Together we design digitally controlled economic spaces of the future.

**We are ecovium. We develop software and hardware solutions for logistics that make work easier for you as the user and from which industry and society benefit alike.**

Global networks, time pressures and rapidly growing commodity flows in a continuously changing world: the resilience of the delivery chains is becoming a crucial test for our ecosystem. The complex logistic challenges can only be overcome with clever cooperation and digitally controlled processes.

Over 300 people are involved in the development of intelligent logistics IT at ecovium. With passion and experience, we improve the flexibility and networking of business processes and make them more sustainable, both ecologically and economically.

**TransRoad software for transport and shipping management**

In TransRoad, we present a versatile and easy to use Cloud-based software solution that is aimed especially at the transport industry and with which you have full control over all processes and costs from day 1. Not only you, but also your partners and customers gain from the fast and much simpler processes.

**With software solutions like TransRoad and the matching hardware, we are paving the way for the digital transformation of logistics. Join us!**

12  
locations

300+  
employees

250+  
years of logistics competence

5.000+  
customers

34  
software solutions

999+  
hardware installations (p.a.)

## TransRoad

### Low-cost Cloud TMS with quick-start guarantee

#### At last - transport management software with which you can hit the ground running

You don't need any server infrastructure of your own, just a browser to be able to use the Cloud solution with all its functions right away. The implementation by our experts is completed in a very short time, either on-site or remotely.

**TransRoad** covers all important areas of transport management, from route planning to invoicing. Despite the enormous range of functions, the software is self-explanatory and runs (almost) on its own. And if you should have any questions, our Service team will be glad to help.

#### Hit the ground running:

- All-inclusive TMS, immediately usable with no server infrastructure of your own
- Low procurement costs thanks to SaaS model
- Fast implementation
- Intuitive operation thanks to modern graphic interface
- Individual configuration of work flows
- Modular structure for maximum flexibility
- Comprehensive update and data protection concept in the Cloud

## TransRoad Everything under control

### THE MOST IMPORTANT SOFTWARE FUNCTIONS

#### Master data

- Current scheduling availability, tariffs and conditions at all times
- Overview of available loading equipment
- Integrated personnel management tool

#### Order management

- Individually configurable input masks and project plans
- Automated creation of orders including data checking
- Automated EDI with different transmission formats

#### Billing

- Automated invoicing
- Creation of contractor invoices
- Open item management and reminders included

#### Controlling

- Clearly visualised key figures on the dashboard
- Individual evaluations in tabular and pivot form
- Extensive standard evaluations

#### Automated work flows

- E-mail with link to shipment tracking for all participants
- Automatic POD dispatch after delivery
- Extensive rule collection for legally secure data determination and checking

#### Transport management

- Creation of clear vehicle schedules
- Flexible work flows for all projects, including hazardous goods transport
- Comprehensive management of loading equipment

## TransRoad

### Cloud technology for mobile logistics

#### All you need for your mobile future is Internet access.

Complex delivery chains necessitate comprehensive, digitally supported process management. At the same time, the software must be fast and reliable in use. In TransRoad you have a solution for transport management and shipment logistics that meets these requirements

#### TransRoad

- simplifies your business processes
- networks the stakeholders in your logistics ecosystem
- guarantees a time and cost-saving implementation
- facilitates entry to digital management and controlling
- can be adapted and scaled flexibly to suit your requirements
- is a secure Cloud solution that you can access at any time

All the information you need is updated in real-time and displayed clearly on a single user interface. The control of your complete transport logistics is possible from anywhere, as the software is located – well-secured – in a Community Cloud operated by us or in a private Cloud.

## AREAS OF APPLICATION

**TransRoad**  
Takes up your  
transport challenge

## Paper and packaging

With TransRoad you get an individually tailored solution for the transport of paper and cardboard of all kinds, be it raw paper, cellulose or packaging materials.

## Building contractors

With TransRoad you guarantee the timely provision of building materials and construction machinery and shorten your yard time.

## Health service providers

With TransRoad you can organise your time-critical business processes. The Cloud solution makes flexible control possible – even when you're out of the office.

## Hazardous goods transport

With TransRoad you can manage your hazardous goods safely. On the basis of hazardous goods master data, individual additional notes and references to further regulations can be stored.

## Retailers and wholesalers

With TransRoad you can control the entire flow of commodities from the supplier to the end consumer – flexibly and from a central point.

## TransRoad

### New ways with digital logistics solutions

TransRoad supports you in controlling complex transport logistics and making the right decisions on the basis of robust data, because while you have all the relevant information in view, the digital processes that are critical for the business are running reliably and securely in the background.

Think outside the box with us, or: about the entire supply chain. At ecovium, we develop specialised software solutions for all areas of logistics, especially for foreign trade and customs, warehousing, dispatch and transport, in combination with the matching hardware and competent IT consulting. Can you imagine the synergies that are created by a common digital ecosystem?

**We can! Together we can make an even bigger contribution to a resilient and future-oriented economy.**

Let's get started.
